DETAILED ACTION

Status of Claims

1. Claims 10, 14-26 and 30 are pending.
Claims 10, 14-26 and 30 are rejected.
Claims 1-9, 11-13 and 27-29 are cancelled.

Response to Arguments

1. Applicant's arguments, see page 3, lines 7-12, filed December 12, 2006, with respect to the rejection(s) of claim(s) 10 and 23-26 as anticipated by U.S. Patent No. 5,516,451 (Schmitt), under 35 U.S.C. § 102(b) and claims 10, 14-26 and 30 under 35 U.S.C. § 103(a) as being Unpatentable over Schmitt have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Egan et al. (US 3,382,285).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

5. Claims 10, 14-26 and 30 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Egan et al. (US 3,382,285).

Art Unit: 1621

Egan et al. teach liquid nonionic polyoxyalkylene surface-active materials having the claimed formula (see entire disclosure, in particular column 2, lines 1-26). The polyoxyalkylene products are made by condensation of fatty alcohols with ethylene oxide and propylene oxide (see column 2, line 27 to column 4, line 73). The condensation products have use as detergents (see column 4, line 74 to column 5, line 73).

Egan et al. sometimes differ from the instant claims in the molar ratios of propylene oxide and ethylene oxide and the concentration of the reactants. One having ordinary skill in the art would have found it obvious to vary the molar ratios of propylene oxide and ethylene oxide and the concentration of the reactants depending upon the desired final product (see column 3, line 2 to column 4, line 11). Further, changes in temperature, concentrations, or other process conditions of an old process does not impart patentability unless the recited ranges are critical, i.e., they produce a new and unexpected result. In re Aller et al., (CCPA 1955) 220 F2d 454, 105 USPQ 233.
